

Candidate B · Task 3, query 5 · FAILURE

Scene before the action chunk

Subtask: “grasp the butter”

Reasoning says FORWARD + DOWN; robot actually moved mostly UP (12.1 mm), opposing the stated DOWN.

Locally sensible intent: “move down and forward” → wrong physical execution

Executed $\Sigma\Delta EE$: [-1.1, +11.3, +12.1] mm cosine = -0.469 < 0 → directions oppose (arrow lengths normalized)
