

Candidate C · Task 18, query 14 · FAILURE

Scene before the action chunk

Subtask: “move to the frying pan”

Reasoning says FORWARD + LEFT + DOWN; robot actually moved mostly BACK (7.9 mm), opposing the stated FORWARD.

Locally sensible intent: “move down and forward and left” → wrong physical execution

Executed $\Sigma\Delta EE$: [+7.9, -2.3, +0.9] mm cosine = -0.456 < 0 → directions oppose (arrow lengths normalized)
